ABOUT ME

I am a Front-End Designer and Developer. I've been working as a UI/UX Designer since 2014 and as a Front-End Developer since 2015.

I have worked in the publishing industry, in the SASS industry (CRM) and I am currently working in the transportation industry where my main focus are design and development for Kiosks, Mobile Applications, E-Ticketing Platforms and Admin applications. I also provide assistance in some DevOps functions.

I currently work extensively with React, React Native and VueJS.

DEVELOPMENT EXPERIENCE

- React
- React Native
- VueJS
- ExpressJS
- Electron
- Java
- PHP
- Classic ASP

EDUCATION

University of North Florida

B.S. in Communication
Class of 2015

EXPERIENCE

Transcor Data Services

Senior Front End Engineer/Designer

Oct 2019 – Now

As a Front-End Developer and Designer my duties switch between designing and developing front-end experiences for applications ranging from Kiosks, Mobile Applications, E-Ticketing Platforms and Admin applications. I also assist with more DevOps related tasks like testing and integrating SDKs for new hardware, debugging build issues, investigating new development tools and setting up projects from scratch.

GleanView

Front End Designer & Developer

Aug 2016 – Sep 2019

GleanView is a CRM tool for small and medium businesses. I was in charge of designing new features for the application, managing, designing and improving on the company's branding while also being in charge of development for the marketing website.

Jacksonville Business Journal

Designer

Feb 2015 – Aug 2016

JBj was one of my first jobs after college. I was in charge of the print design for the newspaper, design and development for landing pages for events, and design for digital and print advertisements.
